

Phycology Assistant – GreenWater Laboratories

Location: On Site - GreenWater Laboratories, 205 Zeagler Drive, Ste 302, Palatka FL 32177

Job Description

We are looking for a highly motivated candidate to assist with our phycological services including algal identification, quantitative algal cell counts, and potentially toxigenic cyanobacteria screens. The applicant will be working individually and with other staff to successfully achieve project goals and produce reports to be directly submitted to clientele. We are looking for a candidate that is willing to begin employment on a temporary basis but is interested in a long-term position with the goal of contributing to the continued success of GreenWater Laboratories. Beginning pay will be based on the applicants experience and abilities with increased pay offered after a 6-month probationary period if offered the permanent position.

Duties

- Sample preparation
- Qualitative algal analysis
- Quantitative cell counts
- Biovolume analysis
- Data management and report writing
- Confer with other scientists and work on group projects
- General lab duties
- Maintain the algal culture room

Requirements

Requirements are a B.S. or M.S. in the biological sciences including coursework or practical experience in algal taxonomy and performance of quantitative cell counts. Additional experience in molecular taxonomy of algae would be desirable. Some training will be provided and is dependent on the applicant's knowledge base and aptitude.

To Apply:

- 1) Visit www.greenwaterlab.com and become familiar with who we are and what we do.
- 2) If interested, email a resume with 3 references to info@greenwaterlab.com
